Educational Team

Faculty composed of teachers and professionals which form an essential link between the requirements of companies and the educational objectives imposed by this training.

Hybrid Learning

At INTUNS, we are opting for the blended learning approach. Students learn at home via electronic, online media, through paper 'packs' of resources as well as traditional face-to-face teaching to ensure students are given equal opportunities to access the curriculum, whether in University or learning at home. Home learning builds on and complements what is done at the University. The blended learning approach considers how to incorporate.

Synchronous Learning

Synchronous learning is teaching and learning that happens where the teacher is present at the same time as the students, meaning that there is real-time interaction between them.

- Resources and activities delivered online, e.g., through Microsoft Teams.
- Recorded lessons/video instruction/podcasts.
- Flipped learning – students engage with material before discussions in class.

Independent Learning

Asynchronous learning is learning that does not necessarily happen at the same time for the teacher and the students. There is no real-time interaction; the learning resources are created and made available for students to use later.
